About Me

AUTHORIZED INSTRUCTOR

Valid through September 2016

- Cloud Integration via API
- Founder of talkcrypto.org
- Involved in STEM based initatives

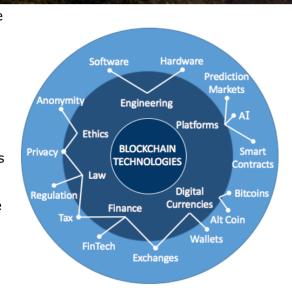

Sharing knowledge of digital currencies and blockchain technologies to students in Hutt Valley.

Never before in human history have we seen such a phenomenal amount of innovation as we do today. The invention of bitcoins revealed an underlying technology called the blockchain that has allowed innovation to flurish in a diverse range of industries.

Once limited to "computers geeks", this technology has spanned across new fields forcing governments to rethink policies and laws, academics to explore new areas of research and entrepreneurs to be more creative and innovative than ever.

Join us as we look to learn and share our knowledge with everyone around us.

A block

https://www.anintegratedworld.com/whats-in-a-block/ (Feb 2016)

Anatomy of a Blockchain

Let's clarify the meaning of Blockchains

Types of Blockchains

- Public Blockchain
- Private Blockchain
- Permissioned
- Permissionless

Securing the Blockchain

- Distributed nodes around the world
- Racing to solve a puzzle
 - http://www.talkcrypto.org/blog/2016/07/27/going-pow-on-the-blockchain/
- Energy in the form of electricity
- Reward is given in return

Nodes Around The World

GLOBAL BITCOIN NODES DISTRIBUTION

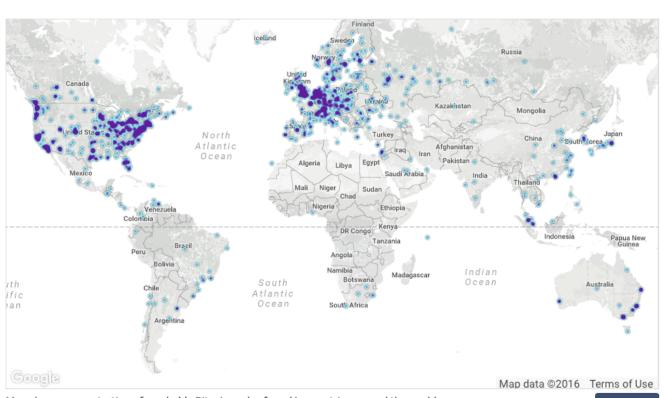

Reachable nodes as of Mon Oct 10 2016 12:54:28 GMT+1300 (NZDT).

5102 NODES

24-hour charts »

Top 10 countries with their respective number of reachable nodes are as follow.

RANK	COUNTRY	NODES
1	United States	1422 (27.87%)
2	Germany	858 (16.82%)
3	France	438 (8.58%)
4	Netherlands	290 (5.68%)
5	Canada	258 (5.06%)
6	United Kingdom	216 (4.23%)
7	China	160 (3.14%)
8	n/a	159 (3.12%)
9	Russian Federation	131 (2.57%)
10	Sweden	83 (1.63%)

Map shows concentration of reachable Bitcoin nodes found in countries around the world.
